

European Assistance for Innovation Procurement (*eafip*) Workshop for Security Sector Procurers 9th June 2016, Riga (Latvia)

PROGRAMME

The European Commission (EC) is pleased to organise this one-day workshop targeting public procurers in the security / defence / law enforcement / disaster and crisis management sectors (e.g., ministries of interior, defence, justice; regional and local authorities; police forces; fire and rescue services; disaster and crisis management centres etc.).

The workshop is part of the European Assistance for Innovation Procurement (*eafip*) initiative launched by the EC to mainstream, promote and assist the implementation of innovation procurements in Europe.

The aim of the workshop is to provide procurers with access to good practices and hands-on support, through presentations of case examples and lessons learned, funding opportunities and discussion sessions.

Don't miss the opportunity to hear first-hand from the European Commission services about the upcoming Horizon 2020 funding for 2016-17 that supports procurers to undertake innovation procurements jointly.

The event offers the opportunity for networking and will ensure broad debate and lively discussion between public procurers, policy markets and other stakeholders.

Venue: The Latvian War Museum
20 Smilsu Street
(Pulvertornis) Riga
LV-1050 Latvia

Organised by

Ministry of Defence
Republic of Latvia

BACKGROUND INFORMATION

The *eafip* initiative

The *eafip* initiative focuses on the promotion of the benefits of innovation procurement, providing at the same time training based on a toolkit that is addressed to policy makers, procurement officers and procurement law firms. Assistance will also be offered to public procurers across the EU with a concrete interest in implementing innovation procurements.

For further information please visit our website: eafip.eu.

What can innovation procurement do for you?

Innovation procurement empowers public authorities to obtain pioneering, innovative solutions customised to their specific needs. It helps local and central governments to provide tax payers with the best possible quality services, while at the same time saving costs.

The European public sector faces significant societal challenges in areas such as health and ageing, climate change, public transport energy, security and resource scarcity. The public sector is also under pressure to modernise its internal operations while delivering high quality public services. Innovation procurement can deliver solutions to these challenges through a smart combination of Pre-Commercial Procurement (PCP) and Public Procurement of Innovative solutions (PPI).

Public procurers have a lot to gain from innovation procurement. It enables the public sector to modernise its services in a cost effective manner, creating at the same time market opportunities for companies in Europe.

Impact studies show that innovation procurement creates on average 20% cost savings on public procurement expenditure (which constitutes about one fifth of Gross domestic product (GDP) in Europe – or around € 2,400 billion a year). Innovation procurement is also a way to foster growth and create new jobs, not in the least for the smaller innovative companies that are the backbone of the European economy and which are ideally placed to supply these new innovative products and services.

WORKSHOP AGENDA

Thursday 9th June 2016
